Click on verify and you will be redirected to this page:

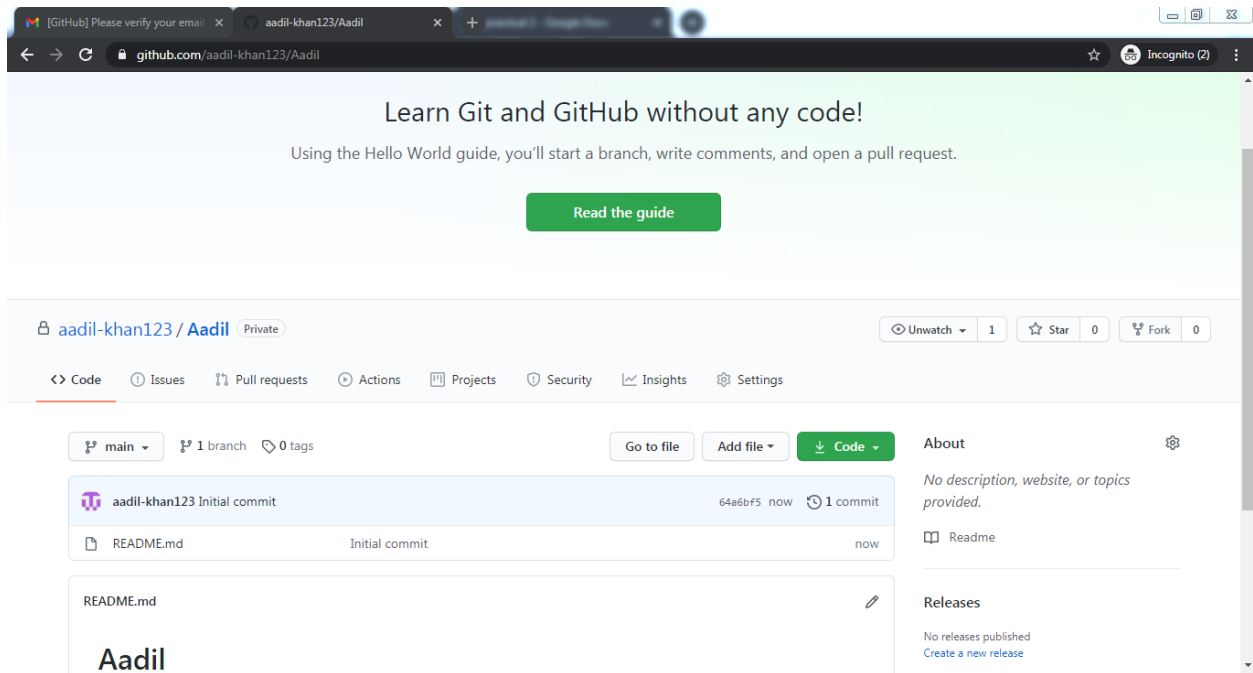

To create a repository

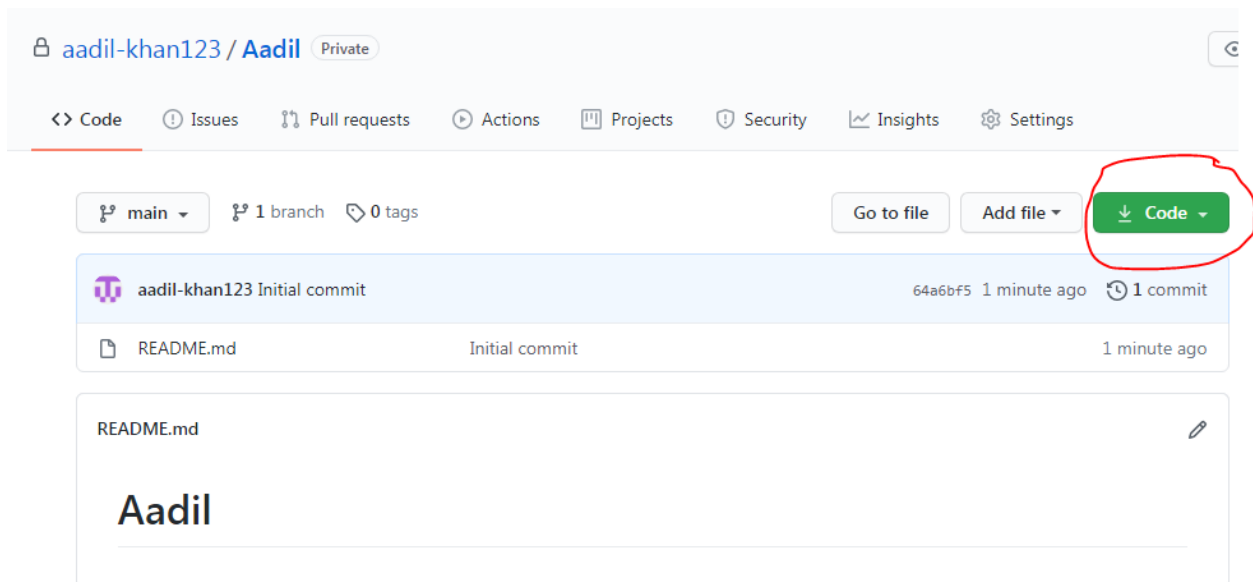

Fill in the information according:

The screenshot shows the GitHub "Create a New Repository" form. The "Owner" field is set to "aadil-khan123" and the "Repository name" field is set to "Aadil". The "Description (optional)" field is empty. The "Public" radio button is selected, indicating the repository will be public. Under the "Initialize this repository with:" section, the "Add a README file" checkbox is checked. The "Add .gitignore" and "Choose a license" checkboxes are unchecked. At the bottom, there is a green "Create repository" button.

Now you can see your repository in your account

To clone the repository click on the green color code button:

Copy the url by clicking here:

The screenshot shows a GitHub repository page for 'aadil-khan123 / Aadil'. The repository is private and has 1 branch and 0 tags. The 'Code' dropdown menu is open, showing options to clone the repository using HTTPS, SSH, or GitHub CLI. The HTTPS URL is highlighted with a red circle: `https://github.com/aadil-khan123/Aadil`. Below the URL, there is a text input field with the same URL and a copy icon. The repository's README.md file is visible, showing the word 'Aadil'.

Repository: aadil-khan123 / Aadil (Private)
